About Me

Enthusiastic, detail-oriented Computer Science diploma student from University Technology of Malaysia. With strong foundation in data structures, coding basics and algorithm designs. Experienced in using various coding languages along the lines of JavaScript, C++, HTML and CSS.

Project Experiences

The Ravenclaw Archive

2025

Designed and developed a Harry Potter themed portfolio website using HTML, CSS, Bootstrap, and JavaScript.

Created interactive magical utilities including:

- BMI Calculator
- Tax Estimator
- Measurement Converter
- Basic Calculator

Implemented responsive layouts, glassmorphism UI, and GitHub Pages deployment.

Academic Web Programming Projects

2025 - Present

Developed multiple interactive web applications during diploma coursework using JavaScript functions, forms, and external styling.

Worked with:

- HTML
- CSS
- Bootstrap
- JavaScript

Creative Hobby Projects

2020 - Present

Create handmade crochet projects requiring patience, creativity, and attention to detail.
